PROFESSIONAL SUMMARY

Machine Learning Engineer who takes models from **raw data to a deployed, monitored service**: feature engineering, training, systematic hyperparameter search, honest evaluation, and packaging for production via **ONNX, Docker, FastAPI and AWS**. Currently an **AI Engineer Intern at Injaz Tech**, turning an LLM/RAG prototype into a tested **FastAPI** service with a CI evaluation gate. Completing an **MSc in Artificial Intelligence at Queen's University, Canada** (expected **Nov 2026**) on a **Digilians Presidential Scholarship**. Delivered supervised, self-supervised and reinforcement-learning systems — including a **42-experiment** vision sweep reaching **84.30% top-1 accuracy** with ONNX/FAISS retrieval, a satellite collision-risk model operating on a **48-hour** decision window, and a fine-tuned LLM served on AWS. Strong software-engineering base from national-scale backend systems, and **6 years** teaching ML to **10,000+ learners**.

EDUCATION

MSc in Artificial Intelligence — *Sep 2025 – Nov 2026*
Queen's University, Kingston, Ontario, Canada — Expected Nov 2026 · GPA: 4.30 / 4.30

- **Digilians Presidential Scholarship** — competitive national AI graduate fellowship.
- Coursework: **Deep Learning, Large Language Models, Reinforcement Learning, Cloud Computing, End-to-End ML Pipelines**.
- **Master's Research Project (CISC 898):** training-free decoding-time efficiency for language models — Supervisor: Dr. Rahatara Ferdousi.

B.Sc. Computer & Information Science (Bioinformatics) — *Sep 2019 – Jul 2023*
Assiut University, Egypt — GPA: 3.53 / 4.00

- Graduation Project: **Vitalism Solution** — contactless vital-sign estimation via rPPG. **Grade A+**; **Semi-Finalist, Microsoft Imagine Cup 2023**.

TECHNICAL SKILLS

ML & Deep Learning	PyTorch, TensorFlow, Scikit-learn, XGBoost, LightGBM, CNNs, Self-Supervised & Contrastive Learning, Reinforcement Learning (PPO, DQN), Transformers, Fine-Tuning (LoRA, QLoRA), RAG (LangChain, LangGraph)
Modelling Workflow	Feature Engineering, Class-Imbalance Handling, Cross-Validation, Hyperparameter Optimisation (Optuna), Model Selection, Explainability (SHAP), Ablation Studies, Error Analysis
Data Engineering	Pandas, NumPy, PySpark, ETL Pipelines, SQL, Data Cleaning & Validation, MySQL, MongoDB, SQL Server
Deployment & MLOps	ONNX, Docker, FastAPI, Streamlit, AWS, CI/CD (GitHub Actions), pytest, FAISS, ChromaDB, Git/GitHub, Linux, Reproducible Experiment Design, Latency & Resource Profiling
Programming	Python, SQL, C++, C, C#, Go, JavaScript, MATLAB, Bash

PROFESSIONAL EXPERIENCE

AI Engineer Intern — *Oct 2026 – Present*
Injaz Tech — Injaz Group (formerly Fingerprint Consultancy) — Maadi, Cairo, Egypt

- Built an **agentic RAG assistant** (LangChain, LangGraph, FAISS, cross-encoder re-ranking) and benchmarked retrieval strategies with custom metrics (top-1 accuracy, MRR), raising top-1 retrieval accuracy from **75% to 94%** and cutting false refusals from **5/20 to 1/20**.
- Took it from notebook to service: a **FastAPI** API with streaming, answer caching (repeat-question latency **34.7 s to 1.6 s**) and fault tolerance, **Docker** packaging, a **136-test pytest** suite and a **CI evaluation gate** that blocks quality regressions.

Machine Learning Instructor — *Aug 2026 – Sep 2026*
National Telecommunication Institute (NTI) — Arish & Assiut, Egypt

- Rehired to teach two **90-hour** applied machine learning bootcamps to **50 trainees**: Arish branch (Aug 2026, online, co-instructor) and Assiut branch (Sep 2026, delivering **59 of 90 hours**).
- Taught linear and logistic regression, SVM, KNN, Naive Bayes, PCA and neural networks through Python labs (NumPy, Pandas, Scikit-learn); wrote the final exams and evaluated end-to-end capstone projects delivered as GitHub repositories and Streamlit apps.

Machine Learning Instructor *Jul 2025 – Sep 2025*
National Telecommunication Institute (NTI) Cairo, Egypt

- Delivered a **90-hour** hands-on ML program for engineering and CS students covering supervised learning, PCA and neural networks, with practical lab sessions throughout.

AI in Cybersecurity Intern *Jun 2025 – Jul 2025*
e& Egypt — via NTI (On-the-Job Training) Cairo, Egypt

- Applied AI-driven security tooling across threat intelligence, digital forensics and enterprise security analysis.

Systems Engineer (Military Service) *Feb 2024 – Mar 2025*
National Company for Roads Building & Development Cairo, Egypt

- Supported backend systems for national toll infrastructure serving **50%+ of Egyptian vehicles** across **70%+ of national roads**.
- Co-developed an internal data-management and reporting desktop application in **C#, .NET, Entity Framework, SQL Server** and **Crystal Reports**.

Online Instructor — AI, Algorithms & Data Science *2020 – Present*
Udemy & YouTube Remote

- Built and taught Arabic-language technical curricula reaching **10,000+ learners** and **700K+ YouTube views**.

SELECTED MACHINE LEARNING PROJECTS

SimCLR-Vision-SSL — Self-Supervised Learning with Deployment-Ready Retrieval *2026*
PyTorch · SimCLR · SupCon · ONNX · FAISS

- Built a full self-supervised training pipeline and ran a **42-experiment augmentation sweep** to isolate which transformations actually drive representation quality.
- Extended the model with a semi-supervised **SupCon** objective and reached **84.30% top-1 accuracy**, evaluated on both classification and image-retrieval tasks.
- Exported the trained encoder to **ONNX** and served embeddings through a **FAISS** index, making the pipeline deployment-ready rather than notebook-only.

SCRAP — Satellite Collision Risk Assessment & Prediction *2026*
Python · Scikit-learn · Supervised Learning · Feature Engineering

- Built a supervised ML pipeline that predicts satellite collision risk using only conjunction data available **48+ hours** before closest approach — deliberately constrained to match the real operational decision window rather than maximising offline accuracy.
- Handled a heavily imbalanced target and engineered features from raw conjunction data, evaluating with metrics appropriate to rare, high-cost events.

RL-Cloud-Autoscaler — Deep RL for Cloud Resource Provisioning *2026*
Python · PPO · DQN · Gymnasium

- Built a **custom Gymnasium environment** simulating cloud workload dynamics and trained **PPO** and **DQN** agents to optimise the **cost–latency trade-off**, benchmarked against static and threshold-based autoscaling baselines.

Horus-OSINT — Fine-Tuned LLM Served on AWS *2026*
Meta-Llama-3-8B · Fine-Tuning · AWS · Python

- Fine-tuned **Meta-Llama-3-8B** on **159,826** GTD/GDELT records — dataset construction through training and evaluation — and deployed it on **AWS** as an interactive assistant.

Additional Projects

- **AudioShield** — CNN trained on mel-spectrograms for deepfake audio detection, served with real-time inference through a Streamlit application.
- **Verbosity-Aware Decoding** — MSc research on training-free token reduction at decoding time (**25–35%** fewer tokens on MT-Bench), benchmarked on MT-Bench, XSum and SQuAD-v2 with latency and GPU-energy profiling.
- **Human vs. Agentic Pull Requests** — reproducible GitHub-mining and analysis pipeline over large-scale open-source repositories.
- **Also:** Vitalism Solution (rPPG) · Diabetes Onset Prediction · ATM Transaction Analysis · Automated Multimodal Agent.

CERTIFICATIONS & AWARDS

AWS Academy — ML Foundations, ML for NLP, Data Engineering
Machine Learning Specialization — DeepLearning.AI
HCIP – AI (Huawei)
Microsoft Certified: Data Analyst Associate
ML Internship — ITIDA / Egypt Makes Electronics (200 hrs)
AI in Cybersecurity — NTI (420 hrs)
1st Place — Smart Cities Hackathon 2022
Semi-Finalist — Microsoft Imagine Cup 2023
