PROFESSIONAL SUMMARY

Data Scientist who builds models around the **decision they have to support**, not around the leaderboard. Built a satellite collision-risk model deliberately restricted to data available **48+ hours** before closest approach — matching the real operational window — and a reproducible **repository-mining study** answering a measurable question about engineering effort. Strong statistical foundation: six years teaching **probability, statistics, discrete mathematics and graph data mining** to **10,000+ learners**, and research-grade experimentation including **paired non-inferiority testing** and controlled ablation sweeps. As an **AI Engineer Intern at Injaz Tech**, designs the evaluation behind an LLM assistant — retrieval benchmarks, category-split scoring and a CI regression gate. Completing an **MSc in Artificial Intelligence at Queen's University, Canada** (expected **Nov 2026**) on a **Digilians Presidential Scholarship**. **Microsoft Certified: Data Analyst Associate**.

EDUCATION

MSc in Artificial Intelligence — *Sep 2025 – Nov 2026*
Queen's University, Kingston, Ontario, Canada — Expected Nov 2026 · GPA: 4.30 / 4.30

- **Digilians Presidential Scholarship** — competitive national AI graduate fellowship.
- Coursework: **Deep Learning, Large Language Models, Reinforcement Learning, Cloud Computing, End-to-End ML Pipelines**.

B.Sc. Computer & Information Science (Bioinformatics) — *Sep 2019 – Jul 2023*
Assiut University, Egypt — GPA: 3.53 / 4.00

- Quantitative foundation in statistics, probability, discrete mathematics, data analysis and bioinformatics.
- Graduation Project: **Vitalism Solution** — **Grade A+**; **Semi-Finalist, Microsoft Imagine Cup 2023**.

TECHNICAL SKILLS

Statistics & Experimentation	Probability & Statistical Inference, Hypothesis Testing, Paired Non-Inferiority Testing, Controlled Experiments & Ablation Design, Class-Imbalance Handling, Cross-Validation, Error Analysis, LLM & RAG Evaluation (LLM-as-Judge, Retrieval Metrics, MRR), Reproducible Analysis
Modelling	Scikit-learn, XGBoost, LightGBM, Logistic & Linear Models, Feature Engineering, Hyperparameter Optimisation (Optuna), Model Explainability (SHAP), Deep Learning (PyTorch, TensorFlow)
Data Engineering	SQL, Pandas, NumPy, PySpark, ETL Pipelines, Data Cleaning & Validation, Repository & API Data Mining, MySQL, MongoDB, SQL Server
Analytics & Reporting	Power BI (*Microsoft Certified: Data Analyst Associate*), Matplotlib, Streamlit Dashboards, Crystal Reports, Executive-Ready Insight Communication
Deployment	AWS, Docker, FastAPI, ONNX, Git/GitHub, Linux, CI/CD
Programming	Python, SQL, R, C++, C#, MATLAB, Bash

SELECTED DATA SCIENCE PROJECTS

SCRAP — Satellite Collision Risk Assessment & Prediction — *2026*
Python · Scikit-learn · Feature Engineering · Imbalanced Classification

- Built a supervised risk model constrained to conjunction data available **48+ hours** before closest approach — deliberately trading offline accuracy for a prediction that arrives in time to act on.
- Engineered features from raw conjunction records and handled a severely imbalanced target, selecting evaluation metrics appropriate to rare, high-consequence events rather than headline accuracy.

Analyzing Review Effort: Human vs. Agentic Pull Requests — *2026*
Data Mining · Statistical Analysis · Reproducible Pipelines

- Built an end-to-end **GitHub-mining pipeline** — collection, cleaning, cohort definition and analysis — to quantify whether AI-generated pull requests shift reviewer effort compared with human-authored ones.
- Defined comparable cohorts and explicit inclusion criteria so the comparison measured the intended effect rather than sampling artefacts.

SimCLR-Vision-SSL — Controlled 42-Experiment Study — *2026*
PyTorch · Experimental Design · Ablation Analysis

- Designed and executed a **42-experiment sweep** isolating which augmentations drive representation quality, reaching **84.30% top-1 accuracy** — a controlled study rather than a single tuned run.

Verbosity-Aware Decoding — Research-Grade Evaluation Design *2026 – Present*
MSc Research Project (CISC 898), Queen's University · Statistical Testing

- Built a **pre-registered evaluation protocol** using **paired non-inferiority testing** to prove a cost reduction did not degrade quality — the statistically correct framing for "no worse than", which a standard significance test cannot answer. Result: **25.5–34.9%** fewer tokens on MT-Bench with every pre-registered criterion met.

Additional Projects

- **ATM Transaction Analysis** — exploratory data analysis and statistical reporting on transaction data in **R**.
- **Diabetes Onset Prediction** — supervised classification pipeline on clinical risk-factor data.
- **Horus-OSINT** — curated **159,826** GTD/GDELT records into a training corpus and deployed a fine-tuned model on AWS for natural-language querying of global event data.
- **Also:** RL-Cloud-Autoscaler (PPO/DQN cost optimisation) · AudioShield · HORUS Sentinel · Vitalism Solution.

PROFESSIONAL EXPERIENCE

AI Engineer Intern *Oct 2026 – Present*
Injaz Tech — Injaz Group (formerly Fingerprint Consultancy) Maadi, Cairo, Egypt

- Designed the evaluation behind an LLM/RAG assistant: retrieval benchmarks (top-1 accuracy, MRR; top-1 rose from **75% to 94%**), a 34-question category-split test set and a CI regression gate with an explicitly justified noise tolerance.
- Used a deterministic key-fact metric to show that a +0.06 LLM-judge gain from a prompt change was wording sensitivity rather than better answers, and rejected the change; measured judge-to-metric agreement at **0.82**.

Machine Learning Instructor *Aug 2026 – Sep 2026*
National Telecommunication Institute (NTI) Arish & Assiut, Egypt

- Rehired to teach two **90-hour** applied ML bootcamps (**50 trainees**) at the Arish (online) and Assiut branches — regression, SVM, KNN, Naive Bayes, PCA and neural networks with Python labs, final exams and capstone-project evaluation.

Machine Learning Instructor *Jul 2025 – Sep 2025*
National Telecommunication Institute (NTI) Cairo, Egypt

- Delivered a **90-hour** hands-on program covering supervised learning, **PCA** and neural networks, guiding students through complete analyses on real datasets.

AI in Cybersecurity Intern *Jun 2025 – Jul 2025*
e& Egypt — via NTI (On-the-Job Training) Cairo, Egypt

- Applied AI-driven analytical tooling across threat intelligence, digital forensics and enterprise security analysis.

Systems Engineer (Military Service) *Feb 2024 – Mar 2025*
National Company for Roads Building & Development Cairo, Egypt

- Supported backend data systems for national toll infrastructure serving **50%+ of Egyptian vehicles** across **70%+ of national roads**.
- Co-developed an internal **data-management and reporting** application in **C#, .NET, Entity Framework, SQL Server** and **Crystal Reports**, delivering operational reporting across multiple departments.

Online Instructor — Statistics, Probability & Data Science *2020 – Present*
Udemy & YouTube Remote

- Authored and taught Arabic-language courses in **probability, statistics, discrete mathematics, algorithms and graph data mining** for **10,000+ learners** (**700K+ views**).

CERTIFICATIONS & AWARDS

Microsoft Certified: Data Analyst Associate (Power BI)

Machine Learning Specialization — DeepLearning.AI

HCIP – AI (Huawei)

1st Place — Smart Cities Hackathon 2022

AWS Academy — Data Engineering, ML Foundations, ML for NLP

Data Analysis in R — 57357 Children's Cancer Hospital

ML Internship — ITIDA / Egypt Makes Electronics (200 hrs)

Semi-Finalist — Microsoft Imagine Cup 2023
