PROFILE

Egyptian AI engineer and educator who has spent six years giving away what he learns. Built free and low-cost Arabic-language technical education reaching **10,000+ learners** and **700K+ views** — addressing a real access gap, since rigorous computer-science material rarely exists in the first language of the students who need it most. Elected **Secretary of the Higher Scientific & Technological Committee** of the Assiut University Student Union, served as an **Institute Ambassador**, and led a volunteer team at the **USAID University Center for Career Development** helping students prepare for employment. Currently completing an **MSc in Artificial Intelligence at Queen's University, Canada** on a fully competitive **Digilians Presidential Scholarship** (expected **Nov 2026**), and rehired by NTI in 2026 to teach machine learning in Arish and Assiut. Seeking volunteering, fellowship and exchange opportunities where technical skill and cross-cultural collaboration create something useful for people.

VOLUNTEERING & COMMUNITY LEADERSHIP

Volunteer Team Leader — *During undergraduate study*
USAID University Center for Career Development — Assiut, Egypt

- Led a volunteer team supporting university students with career development and employability preparation at a USAID-funded centre.
- Coordinated team activities and mentored peers navigating the transition from study to work.

Secretary, Higher Scientific & Technological Committee — *During undergraduate study*
Student Union, Assiut University — Assiut, Egypt

- Elected to organise scientific and technological activities for the student body, coordinating events, competitions and technical initiatives across the faculty.

Ambassador — *During undergraduate study*
Information Technology Institute (ITI), Assiut — Assiut, Egypt

- Represented ITI on campus, guiding students toward free national technical-training pathways they would otherwise not have heard about.

Open Technical Educator — Arabic-Language Computer Science — *2020 – Present*
YouTube & Udemy — Remote, Global Audience

- Created and published Arabic-language courses in **discrete mathematics, algorithms, probability, statistics** and **graph data mining**, reaching **10,000+ learners** and **700K+ views** across the Arab world.
- Awarded **1st Place in the Science & Technology Content Competition** for this work.

EDUCATION & SCHOLARSHIPS

MSc in Artificial Intelligence — *Sep 2025 – Nov 2026*
Queen's University, Kingston, Ontario, Canada — Expected Nov 2026 · GPA: 4.30 / 4.30

- **Digilians Presidential Scholarship** — competitive national AI graduate fellowship funding graduate study at a Canadian university.
- Master's research on efficient, lower-energy language-model inference — reducing the computational and **energy cost** of AI systems.

B.Sc. Computer & Information Science (Bioinformatics) — *Sep 2019 – Jul 2023*
Assiut University, Egypt — GPA: 3.53 / 4.00

- Graduation Project: **Vitalism Solution** — a contactless system estimating vital signs from ordinary video, aimed at making basic health monitoring possible without specialised equipment. **Grade A+**.
- **Ideal Student Award**, Faculty of Computers & Information, 2022–2023 — awarded for combined academic and community contribution.

INTERNATIONAL EXPERIENCE & RECOGNITION

- **Graduate study at Queen's University, Canada** (2025–2026) on a competitive scholarship — team-based research under Canadian faculty supervision.
- **Semi-Finalist, Microsoft Imagine Cup 2023** — global student technology competition.
- **Finalist, ISEIC 2023** — international research and innovation competition.
- **1st Place, Smart Cities Hackathon 2022** — team-based rapid solution development.
- **COVID-19 Contact Tracing** certification — Johns Hopkins University, completed during the pandemic response.

PROFESSIONAL & TEACHING EXPERIENCE

AI Engineer Intern — *Oct 2026 – Present*
Injaz Tech — Injaz Group (formerly Fingerprint Consultancy) — Maadi, Cairo, Egypt

- Building an AI assistant that answers employee questions from internal documentation and refuses rather than inventing answers (LangChain, LangGraph, FastAPI).

Machine Learning Instructor — *Aug 2026 – Sep 2026*
National Telecommunication Institute (NTI) — Arish & Assiut, Egypt

- Rehired to teach two **90-hour** machine learning bootcamps to **50 trainees** in Arish (online) and Assiut, from first principles to end-to-end capstone projects.

Machine Learning Instructor — *Jul 2025 – Sep 2025*
National Telecommunication Institute (NTI) — Cairo, Egypt

- Designed and delivered a **90-hour** hands-on machine learning program for engineering and computer-science students at Egypt's national ICT institute.

AI in Cybersecurity Intern — *Jun 2025 – Jul 2025*
e& Egypt — via NTI (On-the-Job Training) — Cairo, Egypt

- Applied AI-driven tooling across threat intelligence, digital forensics and enterprise security analysis.

Systems Engineer (Military Service) — *Feb 2024 – Mar 2025*
National Company for Roads Building & Development — Cairo, Egypt

- Completed national military service supporting backend systems for public road and toll infrastructure serving **50%+ of Egyptian vehicles** across **70%+ of national roads**.
- Co-developed an internal data-management and reporting application used across multiple departments.

SKILLS

Leadership & People	Team Leadership, Volunteer Coordination, Mentoring, Event & Activity Organisation, Public Speaking, Teaching & Facilitation, Cross-Cultural Communication, Working in Multilingual Teams
Technical	Artificial Intelligence, Machine Learning, Python, Data Analysis, Large Language Models, RAG, Computer Vision, Cloud Computing (AWS), Software Development (C#, .NET, Angular), SQL
Technology for Good	Accessible Health Technology (contactless vital signs), Open Educational Content, Energy-Efficient AI, Synthetic-Media & Misinformation Detection, Public-Safety Risk Prediction
Languages	**Arabic** — Native · **English** — Professional Working Proficiency · **French** — Basic

SELECTED PROJECTS WITH SOCIAL RELEVANCE

- **Vitalism Solution** — contactless estimation of vital signs from ordinary video — health monitoring without specialised or expensive sensors. Imagine Cup 2023 Semi-Finalist.
- **AudioShield** — detection of deepfake audio, aimed at protecting people from voice-based fraud and manipulated media.
- **SCRAP** — early warning of satellite collision risk **48+ hours** ahead, supporting safe use of shared orbital space.
- **Efficient AI Research** — master's research cutting the computation and **energy** required to run language models (**25–35%** fewer generated tokens).
- **Also:** multi-agent open-source intelligence platforms · self-supervised computer vision · reinforcement learning for reducing cloud resource waste. Full portfolio: mahmoudalyosifysite.github.io.
