SUMMARY

AI security engineer applying machine learning to **threat intelligence, OSINT and fraud detection**. Trained in AI for Cybersecurity at NTI (420 hours) and applied it at e& Egypt. Built a multi-agent OSINT platform, a threat-intelligence LLM on AWS and a deepfake-audio detector. MSc in Artificial Intelligence, Queen's University, Canada (GPA 4.30 / 4.30).

SKILLS

Security: threat intelligence, OSINT, digital forensics, LLM security (prompt injection)
Machine learning: anomaly detection, deepfake detection, classification, LLM fine-tuning
Tools: Python, PyTorch, TensorFlow, LangChain, FastAPI, AWS
Data: SQL, MongoDB

EXPERIENCE

AI Engineer Intern — Injaz Tech (Injaz Group), Cairo — Oct 2026 – Present

- Added prompt-injection filtering, output leak detection and rate limiting; **0 system-prompt leaks** in 8 attack runs.
- Built a RAG assistant that answers staff questions from company documents, using **LangChain, LangGraph, FAISS** and **FastAPI**.

AI in Cybersecurity Intern — e& Egypt (via NTI), Cairo — Jun 2025 – Jul 2025

- Applied AI tools to threat intelligence, digital forensics and enterprise security analysis.
- Completed NTI's **420-hour AI in Cybersecurity** program behind the placement.

Systems Engineer (Military Service) — National Company for Roads Building & Development, Cairo — Feb 2024 – Mar 2025

- Supported the backend systems of Egypt's national toll network, used by **more than half of the country's vehicles**.

Part-Time Machine Learning Instructor — National Telecommunication Institute (NTI), Egypt — Jul 2025 – Present

- Teach **90-hour machine learning bootcamps** and AI for Business modules in NTI's Summer Internships Program.

PROJECTS

HORUS Sentinel — multi-agent intelligence platform (Python, LLM agents, knowledge graph)

- Designed a team of AI agents that keep collecting open-source information into a **knowledge graph**; a self-hosted LLM writes evidence-backed reports from it.

Horus-OSINT — fine-tuned LLM on AWS (Llama-3-8B, QLoRA, AWS) — 2026

- Fine-tuned **Meta-Llama-3-8B** on **159,826** global event and terrorism records (GTD, GDELT) and deployed it on **AWS** as an assistant that answers questions in plain language.

AudioShield — deepfake audio detection (Python, CNN, Streamlit)

- Trained a CNN to detect deepfake (synthetic) speech for voice-fraud and digital-forensics use; live predictions in a Streamlit app.

EDUCATION

MSc in Artificial Intelligence — Queen's University, Kingston, Canada — Sep 2025 – Oct 2026

- GPA **4.30 / 4.30** · Completed October 2026 · Digilians Presidential Scholarship

BSc in Computer & Information Science (Bioinformatics) — Assiut University, Egypt — Sep 2019 – Jul 2023

- GPA 3.53 / 4.00 (Very Good with Honours) · Graduation project graded A+

CERTIFICATIONS & AWARDS

AI in Cybersecurity, NTI (420 hours) · Fortinet Certified Associate in Cybersecurity · IBM AI Developer Professional Certificate (IBM, 2026) · Generative AI: Boost Your Cybersecurity Career (IBM) · 1st Place, Smart Cities Hackathon 2022 (77 university teams)

LANGUAGES

Arabic (native) · English (professional working proficiency)
